PROFESSIONAL SUMMARY

Computer Engineering B.Sc. candidate with hands-on experience across Content SEO, On-Page SEO, web content management, Microsoft Azure, CI/CD, and AI-enabled applications. Managed SEO-focused Turkish/English content and publishing workflows, and worked with DNS, HTTP routing, deployment, monitoring, GitHub Actions, and LLM integrations. Developing practical skills in Technical SEO and GEO by connecting search visibility with web infrastructure and generative AI.

CORE SKILLS

SEO & SEARCH

Content SEO, On-Page SEO, Content Strategy, keyword-focused content, CTA, crawling/indexing, robots.txt, XML sitemap, canonical, HTTP status codes, 301/302

AI & DEVELOPMENT

Generative AI, Prompt Engineering, LLM/OpenRouter, GitHub Copilot Agent Mode, Python, Flask, FastAPI, REST API, Flutter

CLOUD & DEVOPS

Microsoft Azure, GitHub Actions, CI/CD, Azure DNS, VNet/NSG, Application Gateway, Web App, Azure Monitor, Load Balancer, Docker, ARM/Bicep

DATA & SYSTEMS

MSSQL, MongoDB, MySQL, Microsoft Fabric, Power BI, Raspberry Pi, Qt, sensor integration

PROFESSIONAL EXPERIENCE

Website Management & SEO-Focused Content

Volunteer | 2024-2025

- Managed Turkish and English web publishing, monthly blog/content planning, SEO-focused headings, keyword-aware copy, project descriptions and CTA structures.
- Used organic visibility observations to inform later content plans and provided team guidance/training on SEO- and CTA-focused content practices.

DevOps Engineer Intern

Nephos Systems (Microsoft Partner)

Istanbul | 2026

- Worked with Azure DNS, VNet/NSG, Application Gateway path-based routing, Web App deployment, Azure Monitor/logs, Load Balancer/autoscaling and GitHub Actions CI/CD.
- Built a web-infrastructure foundation relevant to Technical SEO through practical work with DNS, HTTP traffic, routing, deployment, monitoring and performance.

Embedded Systems & Backend Intern

RoboGPT

Bursa | 2025

- Developed Raspberry Pi control scenarios, Flask REST APIs, PID/PWM motor control, sensor integration and Qt-based camera/control tooling; tested and debugged hardware-software communication.

SELECTED PROJECTS

Personal Portfolio - SEO & GEO Landing Page

- Implemented metadata/canonical, robots.txt, sitemap.xml, Person/WebSite/ProfilePage JSON-LD, and Open Graph/Twitter sharing metadata with a 1200x630 OG image route.

AI-Powered Erasmus+ Simulation Platform

- Built an end-to-end application for AI-generated motivation letters/CVs and application evaluation; created scraping/data-transfer workflows with Requests, BeautifulSoup and Playwright for 700+ project records.

EDUCATION & TRAINING

Kayseri University — B.Sc. Candidate in Computer Engineering | Kayseri, Türkiye | 2021-Present (Expected 2027)

Training: GitHub Copilot (GH-300) - In Progress, 2026 | Robotic Coding Instructor Training - 2022
